

CONTENTS

<i>Preface</i>	7
Evaluation and Beneficiation of Bauxites	
<i>P. J Combes, A Gsell, Ph Jacquan, P Lemperière</i> — Low-Grade Bauxites and Clay Deposits in Southern France Different Deposit Types and Mining Conditions	11
<i>J L White</i> — Evaluation of Bauxites by Infrared Techniques	25
<i>K Solymár, Mrs K Jónás</i> — Characterization of the Digestibility of Bauxites by Means of Infrared Spectrophotometry	33
<i>E Alquander, B Balkay, K Solymár</i> — Improving Low-Grade Bauxites by Physical Means of Beneficiation	37
<i>H Gmsberg, K Schonfelder, K Brelfeldt</i> — Chemical Dressing of Alumina Ores by Treatment with Sodium Hydroxide	55
Bauxite Grade's Influence on Alumina Technology	
<i>W H Cundiff</i> — Influence of Bauxite Composition on Alumina Plant Technology	67
<i>V E Davies, J E Lloyd, D Macfie</i> — History of Bauxite Processing in British Aluminium	75
<i>A Juhász</i> — Some Criteria for Comparing Various Means of Processing High-Silica Bauxites	81
<i>W Meusel</i> — Special Observations at the Processing of Tropical Bauxite in European Alumina Plants as a Result of the Higher Organic Substances Content in Such Bauxite Grades	91
<i>N Brown</i> — Kinetics of Crystallization of Aluminium Trihydroxide from Seeded Caustic Aluminate Solutions of Industrial Composition	101
Red Mud's Treatment and Complex Utilization	
<i>I Voros, E Búgdosó, Mrs M Orbán, L Tóth</i> — Causticization of Red Mud	121
<i>M Haerter</i> — Possibilities to Dispose of Red Mud Economically	135
<i>Gy Dobos, Gy Horváth, Z Felföldi</i> — Complex Utilization of Red Mud Including the Production of Pig Iron, Sodium Hydroxide, Alumina and Building Material	151
<i>L I Leontev, B Z Kudinov, V A Derevyankin, S I Kuznetsov</i> — Physical-Chemical and Technological Foundations of Complex Processing of Low-Grade Bauxites and Red Muds Utilizing Rotary Furnaces	159
<i>V G Logomerac</i> — The Agglomeration and Complex Utilization of Red Mud	163
Bauxite Processing by Pyrogenic and Combined Methods	
<i>L Bartosik, K Strnad, M Dananay, V Bartosik</i> — Technical and Economic Problems in the Processing of Low Grade Bauxites for the Production of Aluminium Oxide	175
<i>L Tomka</i> — Technology of Aluminium Oxide Production from Low Modulus Bauxites by the Sintering Method	195
<i>N Eremin, N S Shmorgunenko</i> — Some Theoretical and Practical Questions of Low-Grade Bauxite Processing by the Sinter Process and the In-Series Combined Bayer-Sinter Process	213

<i>Mrs M. F Landi</i> — Present State and Development of Technology of Bauxite and Red Mud Agglomeration Comparison with Present and Future Technology of Montecatini Edison	223
<i>I V Prokopov, N S Malts</i> — Industrial Realization and Perspectives of Further Development for Low Grade Bauxite Processing	237
<i>M, Vrsnansky</i> — Theory and Practice of Sintering Bauxite and Red Mud in the Combined Process	245
<i>V, Ya Abramov, N, S Shmorgunenko</i> — Theory and Practice of the Extraction of Sintners in Processing Low Grade Bauxites	255
<i>A N, Lyapunov, S, K Styazhkin, N S Shmorgunenko</i> — Decompositions of Aluminate Liquors Obtained from High Silica Bauxites	263
<i>M Styczynska, J Nedoma, W Zabinski, W Riesenkaempf</i> — Physicochemical Properties of Sodium Aluminate and Sodium Ferrite Solid Solutions	273
<i>M Styczynska, J Krol, W Zabinski, M, Bohm</i> — Phase Composition of Industrial White Mud	285
<i>A Kratky, S Simko, M, Bohm, M, Vitek</i> — Mathematical Model of the Material Balance of the Sinter Process Using the Computer UNIVAC 9400	293
<i>K H Reisner</i> — Studies on the Reactive Behaviour of Bayer Red Mud in Sintering with Lime and Soda	299
