

CONTENTS

Part I Analytical Methods

R. TERTIAN Chemical Analysis of Bauxites by Means of X-Ray Spectrometers	9
M. F. LANDI X-Ray Fluorescence Analysis of Bauxites	17
J. TATÁR, M. BÉRESS, A. SIKLÓS Method and Instrumentation for the Automatic Analysis of Bauxites	23
M. ORBÁN Appliance of X-Ray Diffractometer in Alumina Production	31
O. KLUG, F. FARKAS, F. KOVÁCS, M. GOMBOS. Investigation on Automatic Determination of the Main Constituents of Aluminate Liquors	39

Part II Chemistry of the Bayer Process

K. SOLYMÁR Recent Results in the Chemistry and Modelling of the Bayer Process	45
S. I. BENESLAVSKI Some Reasons for the Incomplete Recovery of Aluminium Oxide Obtained in the Alumina Plants of the Soviet Union	67
E. DELYANNIS Alkaline Treatment of Diasporic Bauxites	69
I. RIEDL: On the Investigation of the Physico-Chemical Properties and Activating Thermodynamic Functions of the Systems NaOH-H ₂ O and NaOH-H ₂ O-Al ₂ O ₃	77
E. BEREZ, L. SZITA Electrochemical Investigation of the Structure and Equilibrium Conditions of Aluminate Liquors	89
H. IVEKOVIC, Z. BALENOVIC Production of Sodium Aluminate from Sodium Aluminate Liquors	103

Part III Technology and Equipment of the Bayer Process

H. J. FEIK, H. CORDES Present Situation of Crushing and Grinding of Bauxite	111
M. GEISZBUHL, Z. KISS, B. SZABÓ Grinding Properties of Hungarian Bauxites	121
E. HERRMANN Continuous High Pressure Digestion of Boehmitic and Hydrargillitic Bauxites in the 'Two Stream' Process	129
C. SATO, Y. YAMADA Development of Bauxite Slurry Feed in High-Pressure Digestion Process	139
G. WINKHAUS Measurements by Means of Radioisotopes in Industrial Tube Digester and Autoclave Lines of Bauxite Plants	147
E. BUJDOSÓ Calculation of the Real Residence Time Distribution of Fluid in Tanks in Series	159
P. KLÁN Production of Alumina by Alkaline Digestion at High Temperatures and Pressures	163
H. LOOS Red Mud Filtration with Rotary Filters	175
H. PLAETSCHKE Separation of Red Mud with Rotary Filters	181

W SCHWALBACH	The History of Continuous Red Mud Filtration and Methods of Aluminate Liquor Clarification and Hydrate Separation	187
L. REH, H J ERNST	Possibilities of Calcining Aluminium Trihydrate in the Fluid Bed	201
L. VÉTEK	Alumina Calcination Plant with a New Type Heat-Exchanger Equipment	215
G TURPIN, J SANLAVILLE	Calcination of Alumina in the Uguine Kuhlmann Fluid Bed	219
C SATO, A FURUKAWA	Comparative Evaluation of the Economics of Fluory Type and Sandy Type Bayer Alumina	227
F. TÓTH, V GÁL	Separation of Salt Contaminants of the Bayer Cycle by Centrifuging	237
S TORNGREN	Some up to Date Heat-Exchangers for Use in the Bayer Process	245

Part IV Power Economy of the Bayer Process

H F SCANDRETT	Bayer Heat Cycle Via McCabe-Thiele Diagram	255
M. KRASZNAI	Energy Economy of the Bayer Cycle	265

Part V Plant Projection

G SIGMOND, L MAHIG	Establishment of Alumina Plants	277
P SIKLÓSI	The Mathematical Model of Material Flow of Alumina Production According to the Bayer Process	291
B TÓTH	Technical Development of the Ajka Alumina Plant	301
T PINTÉR	New Hungarian Alumina Plant	317

Part VI Complex Technologies

N. I EREMIN	Investigations on the Complex Processing of Bauxites	329
M N SMIRNOV	Physical-Chemical Fundamentals of Alumina Production from Nepheline	337

Part VII By-Products and Contaminants

E BOGÁRDI	The Vanadium Content of Hungarian Bauxites and Its Utilization	349
A DELEON	Recovery of Vanadium from the Vanadium Salt of Alumina Production by Means of the Liquid Ion Exchange Process	359
H MARTENS, S GERISCH, H TIETGENS, S ZIEGENBALG	Technical and Economical Comparison of the Different Methods Used for the Recovery of Vanadium from the Crude Vanadium Salt of the Bayer Process	369
V G. LOGOMERAC	The Distribution of Rare-Earth and Minor Elements in Some Bauxite and Red Mud Produced	383
E. PAPP, S ZSINDELY, L TOMCSÁNYI	Molybdenum and Zinc Traces in the Bayer Process	395
R SIEBERT, G SCHOLZE, S ZIEGENBALG	Investigation of the Production on Low Iron-Content Aluminium Sulphate from Clay	403
