

CONTENTS

Part I Theory on Aluminium Electrolysis

| | |
|--|----|
| K. GRJOTHEIM, C. KROHN, R. NÆUMANN, K. TÖRKLEP: Convection in Commercial Aluminium Cells. Part I. An Experimental Study of Convection | 9 |
| Part II. Implication of Convection on Cell Operation | 29 |
| G. V. FORSBLOM, S. E. GEFTER, A. M. TSYPLAKOV: Role of the Electromagnetic and Thermal Phenomena in the Electrolytic Production of Aluminium | 39 |
| M. TÓTH: Determination of Temperature Distribution and Heat-loss in Conductors Outside the Electrolytic Cell | 49 |
| E. BALÁZS, J. ÁDÁM, A. ARADI: Measurements of the Density of Melts Used in the Production and Refining of Aluminium | 69 |

Part II Technology and Cell-Construction

| | |
|--|-----|
| I. MOLNÁR: Technical Development in the Inota Aluminium Smelter | 87 |
| E. KOLOSY: Aspects in the Construction and Establishment of Aluminium Reduction Plants | 105 |
| P. J. BARAT, J. COURSIER: Current Efficiency in the Electrolytic Production of Aluminium | 113 |
| R. V. SVOBODA, M. L. BLYUSHTEIN, I. M. MALTSEVA, A. B. GLUZ, E. BALÁZS, J. ÖRKÉNYI, F. MOSÓCZI, J. PŐCZE: A Study of Graphitized Carbon Materials Used for the Cathode Lining of Aluminium Reduction Cells | 119 |
| L. KOZÁR: Experiences on Impregnation and Bonding of Cathode Blocks | 131 |
| M. E. BARRILLON: On the Texture of Cokes and Anodes Used in the Electrolytic Production of Aluminium | 141 |
| E. BALÁZS, F. MOSÓCZI: Methods of the Reduction of Carbon Scum Formation of Söderberg Anodes with Vertical Studs | 151 |

Part III Aluminium Metal

| | |
|--|-----|
| M. MISKEI, E. BUJDOSÓ: Investigation of the Boronization Process of Aluminium by Neutron Activation Analysis | 159 |
| K. CH. FISCHER: The Application of Continuous Small Strip-casting to the Production of Die Cast Slug | 163 |
| T. OIKAWA, R. OTSUKA: Studies on Powderless Etching of Photoengraver's Aluminium . . . | 171 |

Part IV Electrocorundum

| | |
|--|-----|
| A. ROMWALTER: Some Problems in the Production of Cast Corundum and Corundum-Baddeleyite Refractory Blocks—Made in Hungary— | 183 |
| W. HARRACH: Influence of Glass and Slag on the Corundum and Corundum-Baddeleyite Products | 189 |
