

CONTENTS

OPENING CEREMONY

V.A. Chzhen Opening of the Symposium and Welcome Address of Co-Chairmen of Org. Committee and the General Director of JSC "VAMI"	5
M.E.Oseyevsky Greeting Address to the Participants of the XVth International Symposium "ICSOBA-2004" on behalf of the Government of Saint Petersburg Vice-governor of Saint Petersburg	7
K.Solymar (Executive Director of ICSOBA). Greeting address of behalf of the ICSOBA Directorate and Hungarian Mining and Metallurgical Society (OMBKE)	8

PLENARY SESSIONS

I.V.Prokopov The russian aluminium industry and some current development trends in the global aluminium market	11
P.Paschen From bauxite to secondary aluminium-supply and demand in a world-wide network	17
V.M.Sizyakov Current state and problems of alumina industry development in Russia	21
Yu.A.Matveyev, V.A.Chzhen, I.K.Tsybukov, N.P.Budkevich, V.M.Alekseyev, A.V.Pavlov. Modern trends on green field projects and technical upgrading of operating Aluminium smelters	25
N.P.Lyakishev, M.I.Alymov, V.I.Kalita, Yu.A.Lainer, E.A.Levashov, B.R.Senatulin. Inert anodes synthesis and testing	29
A.V.Krajnikov, Yu.V.Shmakov, G.E.Thompson. Aluminium alloys for transport produced by new rapid solidification technology	34
A.K.Nandi Bauxite-alumina industry of India – Present status and future Prospects	39
F.Habashi Karl Josef Bayer and his time	44

PARALLEL SESSION

Raw materials for alumina production Red mud utilization

J.See, M.Emond. Use of microscopy and image analysis in mineral liberation studies applied to optimising bauxite beneficiation	52
Yu.A.Layner, A.S.Tuzhilin, S.P.Perekhoda. Aluminium wastes processing for alumina, coagulants and building materials production	57
V.A.Utkov, V.M.Sizyakov, L.I.Leontjev. Theory basis and efficiency of industrial technology of red muds application in ferrous metallurgy	63
E.S.Fomin, N.A.Sabirzyanov*, V.S.Anashkin, S.P.Yatsenko*, V.N.Diev*. New approaches to processing of the muds of alumina production	66
V.S.Shemyakin, A.V.Shemyakin, N.M.Makarov, E.S.Fomin, V.S.Anashkin, V.P.Meltzov. The quality improvement of bauxite product by the method of radiometric classification	72
T.Egyházy, J.Kovács, T.Fülöp, K.Solymár. Utilization of bauxite residue by modified metallurgical concept	77
V.V.Pivovarov, A.K.Romashev, N.N.Tikhonov, Y.O.Fedorov, Y.I.Azbel. On problem of nepheline ores beneficiation	86
G.Komlóssy, Z.Unger Application of remote sensing techniques in bauxite resource estimation	88
V.S.Burkat, R.V.Mhchan, V.I.Smola, V.A.Utkov. The improvement of the ecological safety of the aluminum industry in the Russian Federation	93
N.V.Sergeeva, T.V.Slyshkina, S.V.Kashansky, V.A.Zykova, O.V.Simonova, O.V.Shirokova. Hygienic estimation of harmful substances emission in the atmosphere through aeration apertures of Bogoslovsky and Ural aluminium factories	98
J.Kovács, T.Fülöp, T.Egyházy. Relationship of filterability, washability and morphological characteristics of red mud slurries	101
A.S.Seniuta, I.V.Vavydov. Prospects of industrial gallium recovery from aluminium smelter wastes	109
J.Faitli, B.Csoke, K.Solymar. Universal mill for determination of grindability	114
T.Egyhazy, J.Somali, T.Kovacs, A.Varhegyi, V.Jobbagy, N.Kavasi. Radiological aspects of bauxite-mining and processing	118

ALUMINA PRODUCTION

D.Papanastassiou, K.Solymar, T.Ferenczi. Processing of greek monohydrate bauxites under moderate digestion conditions	121
X.Tian. On alkaline recycling efficiency in Bayer process	125
E.Tizon, P.Clerin, B.Cristol. Effect of Bayer liquor impurities on DSP stability and silicalevel during predesilication and digestion operations	129
K.Solymár, T.Ferenczi, jr.T.Ferenzi, Papanastassiou D. Digestion of monohydrate bauxites with lime feeding at high temperature	135
A.G.Pihtovnicov, V.I.Anikeev, N.N.Ananyev. Alumina quality improving in nepheline processing technology	142
V.M.Sizyakov, V.I.Davidov, E.A.Isakov, V.N.Brichkin. Some questions of theory and technology of receiving of sandy alumina from nephelines	145
V.S.Anashkin, V.G.Teslya, L.A.Kuznetsov, E.S.Fomin. Influence of impurities of grain size distribution and morphology of aluminium hydroxide crystals at the precipitation technology	148
A.I.Savchenko, K.N.Savchenko Control of the aluminium hydroxide coarseness during the aluminate – alkaline liquor decomposition ...	155
I.V.Davydov, V.I.Davydov, E.A.Belikov, S.E.Sofyin, S.N.Makarov, N.A.Kuzmin. Development and study of carbonizers of new generation	158

I.V.Davydov, L.L.Fedorova, V.I.Davydov, A.A.Kuznetsov, I.I.Pchelin, E.A.Belikov, S.E.Sofyin, S.N.Makarov, I.Y.Kharitonova. Modernization of aluminate liquors carbonation technology	163
I.V.Davydov, V.P.Borovinsky, E.A.Isakov, B.I.Smolianinsky, A.N.Aminov, N.A.Ivanushkin, A.A.Fedotov, E.V.Mikheev. Development and investigation of new efficient units for treating of alumina production liquors and suspensions	165
N.Kamaev, E.Keller. State of the art design of "red mud filtration" state of the art design of "seed hydrate filtration"	171
A.Bolotov. Investigation of possibility to use organic heat carrier in high-temperature digestion units	175
R.Bott, Th.Langeloh, J.Hahn, F.Mekk. Latest state of the art of Al-Hydrate seed filtration	177
A.A.Khanamirova, L.P.Apresyan, A.R.Adimosyan. Production of highly-dispersed aluminium hydroxide and corundum	185
A.A.Khanamirova Production of ultradisperse corundum ceramics from the wastes	188
R.Ya.Dashkevich, O.N.Simakova, V.I.Kirko, V.I.Anikeyev, B.V.Petrov. Problems of quality improvement of non-metallurgical and metallurgical grade alumina	190
Y.I.Shmigidin Vortex cyclone – high-performance unit for the classification and washing	193
I.V.Domansky, I.V.Davydov, V.P.Borovinsky, E.V.Mikheev, V.I.Davydov. Mathematial model of polydispersed materials hydroclassification process	196
I.V.Davydov, R.S.Volkova. Influence of the main precipitation technology parameters on grain size of aluminium hydroxide	198
N.G.Sribner, O.M.Rozanov, V.G.Teslia. Development of industrial method of soda granulation (within nepheline processing technology)	202
E.A.Nikolaieva, A.I.Savchenko, K.N. Savchenko. Intensification of aluminate-alkali liquor decomposition by dispersed air	206

PRIMARY ALUMINIUM PRODUCTION. PROCESSING OF ALUMINIUM AND ITS ALLOYS

A.P.Skvortsov, S.A.Nikiforov, I.D.Borisov, Y.N.Rudnev. Modeling of physical fields in aluminium cells	208
B.Arlyuk Prospects of the world markets of primary aluminium and smelter grade alumina	212
C.Likata Documenting a recent achievement in aluminium thin gauge foil production technology	218
M.D.Taylor, E.Pilote. Molten metal fluxing/treatment: how best to achieve the desired quality requirements	225
V.S.Kall'chenko, N.A.Kaluzhsky, L.E.Safarova Environmental control in Russian aluminium smelters. Current state and perspectives of development	234
N.V.Golovnykh, V.V.Dorofeyev, V.A.Bychinsky, S.B.Polonsky. A concept of technical measures aimed at improvement of fluorine balance during aluminium reduction	236
Y.Xiaodong Sami's technology of aluminium reduction pots	241
A. Kaiser Forming of prebaked anodes for aluminium smelters by hydraulic vacuum pressing	244
I.V.Ribyanets, L.N.Ruzhevskaya, S.A.Podkopaev, N.P.Nonishneva, A.A.Sviridov. Complex of carbon materials used for lining of aluminium electrolytic cells and tendencies of quality improvement in modern conditions	248
A.E.Ushakov, M.Wiestner. Modern ABB developments for aluminium smelters power supply	251
MINUTES of the Meeting of the ICSOBA Council held in Saint Petersburg	257
